TestDome

TECH STACK

Languages

- JavaScript (ES6+)
- TypeScript
- HTML5 & CSS3

Frontend

- React.js / Next.js
- Tailwind CSS
- GSAP & Framer Motion
- Three.js

Backend & Data

- Node.js / Express.js
- MongoDB
- RESTful APIs

Tools

- Git & GitHub
- Vite / npm

LANGUAGES

English — Intermediate
Urdu — Fluent
Italian — Beginner

RAHIM SIDDIQUI

FULL-STACK DEVELOPER

SUMMARY

Results-oriented Full-Stack Web Developer specializing in the MERN stack (MongoDB, Express, React, Node.js) and TypeScript. Skilled at building responsive, high-performance, and scalable web applications, with a strong focus on clean, maintainable code, modern UI/UX, and disciplined Git version control.

WORK HISTORY

Web Developer — Freelance

April 2026 – Present

- Designed and built responsive websites using JavaScript, TypeScript, React, and Node.js.
- Developed and integrated RESTful APIs with MongoDB for dynamic, data-driven applications.
- Collaborated independently with clients to deliver performant, production-ready web solutions.

PROJECTS

Mojito — Cocktail Selling Website | Next.js, React, GSAP

- Built a responsive, animation-focused UI with scroll-triggered, timeline-based motion effects for a modern user experience.
- Implemented GSAP timelines, stagger effects, and custom easing for smooth, high-performance animations.

MacBook Landing Page — M4 MacBook Recreation | React, HTML, CSS, JavaScript

- Recreated the MacBook 14 interface with high-fidelity, macOS-style UI, glassmorphism effects, and modern styling.
- Implemented interactive system behavior — dock, windows, and UI controls — using React state and JavaScript logic.

Portfolio Website (New) | Next.js, GSAP, Framer Motion, Three.js

- Built a modern, responsive portfolio with reusable components, smooth animations, and performance optimization.
- Implemented interactive 3D elements, scroll effects, and dynamic project showcases.

Portfolio Website (Original) | React, Tailwind CSS, Framer Motion

- Built a fully responsive personal portfolio with smooth animations, reusable components, and optimized performance.
- Integrated a GitHub projects showcase with responsive layouts.

Financial Atelier — Expense Tracker & Budgeting Tool | Next.js, Node.js, Express, MongoDB

- Built a finance platform for portfolio tracking and analytics, with a responsive dashboard for fast data visualization.
- Implemented serverless backend APIs for financial calculations with secure data handling.

Qubli AI — Quiz Taking App | React, Node.js, Express, MongoDB

- Built a quiz application with dynamic quizzes, real-time scoring, and a responsive full-stack UI.
- Implemented quiz logic, question randomization, and result tracking with database integration.

Olivia — Minimal Note Taking App | Next.js, React, Tailwind CSS, Context API

- Built a modern, animated note-taking app with a collapsible sidebar, search modal, and quick-notes system.
- Implemented dynamic note creation, active-note management, and keyboard shortcuts using React state and context logic.

Espresso — Speech-to-Text App | React, Tailwind CSS, Context API, Web Speech API

- Built a clean, minimal speech-to-text app for real-time voice transcription with live recording controls.

- Implemented real-time speech recognition with pause/resume functionality and efficient state management.

Nexus — Minimal Todo List App / *React, Next.js, Framer Motion, MUI*

- Built a simple but powerful todo list app with a dynamic, interactive, and responsive frontend.
- Implemented window management, dock interactions, and UI controls using React state and JavaScript logic.
