EDUCATION

- O Levels | Cambridge Assessment
International Education (CAIE) |
Expected Completion 2027

CERTIFICATIONS

- The Web Developer Bootcamp 2026
| Udemy

- Javascript and Node.js | TestDome

LANGUAGES

- 1. English – Intermediate
- 2. Urdu – Fluent
- 3. Italian – Beginner

Rahim Siddiqui

Full-Stack Developer

SUMMARY

Results-oriented Web Developer with expertise in the MERN stack (MongoDB, Express, React, Node.js) and TypeScript. Proven track record of building responsive, high-performance, and scalable web applications with a focus on clean code and Git version control.

WORK HISTORY

- April 2026 – Present:
 - 1. Web Developer – Freelance
 - 2. Built responsive websites using JavaScript, TypeScript, React and Node.js
 - 3. Implemented RESTful APIs and MongoDB integration

MY TECH STACK

PROJECTS

1. Mojito | Cocktail Selling Website

- Built a responsive animation-focused UI using Next.js, React, and GSAP with smooth motion effects.
- Designed interactive sections with scroll-triggered and timeline-based animations for a modern user experience.
- Implemented GSAP timelines, stagger effects, and easing for fluid, high-performance animations.

2. Macbook Landing Page | Recreation of M4 Macbook Page

- Built MacBook 14 UI clone using React, HTML, CSS, and JavaScript, replicating a macOS-style interface.
- Designed a high-fidelity responsive UI with smooth animations, glassmorphism effects, and modern layout styling.
- Implemented interactive system behavior using React state + JavaScript logic, including dock, windows, and UI controls.

3. Portfolio Website (new) | React, Tailwind CSS, Framer Motion

- Built a modern portfolio website using Next.js, GSAP, Framer Motion, and Three.js with smooth animations and interactions.
- Designed a responsive UI with reusable components, transitions, and performance optimization.
- Implemented interactive 3D elements, scroll effects, and dynamic project showcases.

3. Portfolio Website (old) | React, Tailwind CSS, Framer Motion

- Built a fully responsive personal portfolio website with smooth animations and modern UI.
- Implemented interactive sections, reusable components, and optimized performance
- Integrated GitHub projects showcase and responsive layouts

4. Financial Atelier | Expense Tracker & Budgeting Tool

- Built Financial Atelier, a finance platform using Next.js, Node.js, Express, MongoDB, and serverless functions for portfolio tracking and analytics.
- Developed a responsive dashboard UI with Next.js, enabling clean and fast financial data visualization.
- Implemented serverless backend APIs for financial calculations and portfolio management, with secure data handling

5. Qubli AI | Quiz Taking App

- Built Qubli AI, a quiz app using React, Node.js, Express, and MongoDB with dynamic quizzes and scoring.
- Developed a responsive full-stack UI using HTML, CSS, JavaScript, and REST APIs.
- Implemented quiz logic, randomization, and result tracking with database integration.

6. Olivia | Minimal Note Taking App

- Built Olivia, a modern single-page note-taking application using Next.js, React, Tailwind CSS, and Context API.
- Developed a responsive and animated UI with collapsible sidebar, search modal, quick notes system, and smooth state-driven interactions.
- Implemented dynamic note creation, active note management, keyboard shortcuts, and persistent client-side note handling using React state and context logic.

7. Espresso | Speech-to-Text App

- Built Espresso, a modern single-page speech-to-text application using React, Tailwind CSS, Context API and Web Speech API for real-time voice transcription.
- Designed a clean, responsive, and minimal UI with smooth interactions, live recording controls, and a distraction-free writing experience.
- Implemented real-time speech recognition, pause/resume functionality, and continuous text capture with efficient state management and seamless user interaction flow.

8. Nexus | Minimal Todo List App

- Built Nexus, a simple but powerful Todo List app consisting of React, Next.js, framer-motion, and MUI.
- Built a dynamic frontend interface with interactive components and client-side functionality to deliver a smooth and responsive user experience.
- Built interactive system functionality using React state and JavaScript logic, including window management, dock interactions, and UI controls.
